# MEISTER DESIGN FLOORING

Healthy living can be this beautiful

---

MEISTER

Do you want a breath of fresh air for your home? We have the answer: design flooring! With its highly modern appearance, this innovative flooring looks its best in every room. Produced with no PVC or harmful plasticisers, it is the wholesome alternative to vinyl floorings, as well as extremely robust, easy to maintain and simple to install. Because one thing is clear: You spend a lot of time with your floor – so it should suit you and your requirements perfectly.

We are not the only ones who think that is fantastic: In addition to the Blue Angel eco-label and the PEFC seal for sustainability, all our design flooring is now also certified by the eco-INSTITUT. The eco-INSTITUT label assesses the levels of emissions and harmful substances in a product, with a particular focus on odour testing – because no one wants flooring that gives off an unpleasant smell.

Only very few design floors are certified with the eco-INSTITUT label. The reason: The permissible thresholds are much lower than the law requires. The testing criteria are also far stricter than those of other certifications. We undergo this examination every two years, and completely voluntarily. Because we want you to know that you can trust our products!

# Simply outstanding: Design flooring from MEISTER.

---

It goes without saying that we have confidence in our own products. So it's all the better, when this is validated by independent testing institutions!

## ECO-INITIUT "TESTED PRODUCT"

The eco-INITIUT label certifies construction and furnishing products with particularly low levels of harmful substances and emissions. Such products have much lower limit values than the statutory requirements and meet the special requirements for indoor air quality. Particular emphasis is placed here on an extensive analysis of emissions and materials, as well as an additional olfactory examination.

With our completely PVC and phthalate-free products, we are one of only a few manufacturers to be awarded the eco-INITIUT label for design flooring. That makes us proud, and guarantees you a wholesome MEISTER design floor, low in harmful substances!

## BLUE ANGEL

The result of our responsible choice of materials and modern manufacturing processes is that all MEISTER design flooring bears the Blue Angel seal – the world's first and most well-known award for environmentally friendly products and services. This means you can be sure you are choosing low-emission, ecological flooring.

## PEFC

The PEFC Council (Programme for the Endorsement of Forest Certification) is the world's largest organisation dedicated to promoting sustainable forest management through forest certification and the labelling of timber products. Products with the PEFC label provide the certainty that the raw materials come from sustainably managed forests. By using the logo we are making a commitment to supporting the ecological and socially responsible management of forests in accordance with PEFC Deutschland e. V.
