

# Maintenance

## WEEKLY

PALLMANN® Hardwood Floor Cleaner is a non-toxic, streak-free pH neutral formula for daily cleaning and maintenance of residential and commercial no-wax wood floor finishes.

The PALLMANN® Hardwood Floor Cleaner may be used with the PALLMANN® Microfiber Pad on a weekly basis or as needed to thoroughly clean your floors. Using the PALLMANN® Hardwood Floor Dusting Pad, lightly dust the floor to remove large debris. A vacuum may also be used for large areas. Clean stubborn spots, spills, and shoe marks by spraying the Hardwood Floor Cleaner directly on the areas.

## MONTHLY

Inspect protector pads on furniture and ensure that all walk-off mats are in proper locations. Also, visually inspect the wood floor for traffic patterns that may be present. If a traffic pattern is noticeable, it may be time to consult a wood flooring professional to discuss recoating your wood floors.

## YEARLY

Contact a **professional hardwood flooring contractor** to deep clean your wood floors using PALLMANN® Clean Strong product every year. Over time, everyday residues such as oils, grease, and dirt will accumulate on the hardwood floor. These residues can act as an abrasive which may cause premature finish wear. **The PALLMANN® Clean Strong product is a professional product that should only be used by a professional hardwood flooring contractor.**

## SEVERAL YEARS LATER

Your wood floor may need a new coat of finish several years after the initial application. This will ensure that you do not wear down the current finish to bare wood, causing expensive sanding procedures. Compared to re-sanding, re-coating is an inexpensive procedure that often can be completed in one day with little to no dust in the home. We recommend using our dustless recoating product PALL-X BOND in combination with one of our waterborne finishes.

# Where to Purchase

Please visit [www.pallmann.us](http://www.pallmann.us) and click "Floor Care Retailers" to search where to buy the PALLMANN Hardwood Floor Cleaning products near you or online.

# Finish Guide

# Who is PALLMANN?

Since 1900, PALLMANN has been providing the latest innovation and technology advancements to the wood flooring industry by creating finishes and maintenance products that are safe for the environment, while also providing beauty, durability and longevity for your home's wood flooring investment.

PALLMANN's project references include grand ballrooms in the French Alps to local coffee shops in Colorado. Our finishes are manufactured and shipped from our production facility in Würzburg, Germany and are stocked locally throughout our American distribution network. We combine German engineering with the technical expertise of American wood floor craftsmen to give your floors the protection and beauty that will last a lifetime.

# Choosing the Perfect Sealer

**Hardwood floor sealer** is applied to the surface of the wood floor to protect against stains and damage.

**PALL-X COLOR Sealer**  
PALL-X COLOR sealer will react with most wood species to bring out the warm rich tones of any wood floor. This sealer is recommended to enhance the vibrancy and depth of a stain color over a wood floor.  
**Note: do not use over white or pastel stains.**

**PALL-X CLEAR Sealer**  
PALL-X CLEAR sealer is ideal when a clear, light tone look is desired. It is also recommended over white or pastel stains prior to the application of the final finish coats.

# Choosing the Perfect Finish

**Hardwood floor finish** creates lasting beauty and protects wood flooring from wear, dirt and moisture while giving the wood an attractive color and sheen.

**PALL-X GOLD Finish**  
PALL-X GOLD is a clear finish which allows the natural beauty of the floor to shine through. It is available in three popular sheen's: Semi-Gloss, Satin, Matte. VOC compliant and 100% fully cured in 3 days allows you to be back on your floor quicker than when choosing traditional oil modified polyurethanes.  
A two component waterborne hardwood floor finish, PALL-X GOLD is designed for commercial and high traffic residential applications.

**PALL-X POWER Finish**  
PALL-X POWER is a clear finish which allows the natural beauty of the floor to shine through. It is available in four popular sheens: gloss, semi-gloss, satin, and ultra matte. VOC compliant and 100% fully cured in 5 days allows you to be back on your floor quicker than when choosing traditional oil modified polyurethanes.  
A single component waterborne hardwood floor finish, PALL-X POWER features **Power Plus Technology** and is designed for commercial or high traffic residential applications.

**PALL-X 96 NEXGEN**  
PALL-X 96 NEXGEN is a clear finish which allows the natural beauty of the floor to shine through. It is available in three popular sheen's: semi-gloss, satin, matte. VOC compliant and 100% fully cured in 7 days allows you to be back on your floor quicker than when choosing traditional oil modified polyurethanes.  
A single component waterborne hardwood floor finish, PALL-X 96 NEXGEN is designed for light commercial and residential applications.
